CHAD HAMILTON

CYBERSECURITY ANALYST | SECURITY OPERATIONS & SYSTEMS ASSURANCE

Wylie, TX | Dallas–Fort Worth | (469) 878-2466 | Justchadham@gmail.com

Portfolio: icynatural.github.io/chad-hamilton-portfolio/ | GitHub: github.com/icyNatural

PROFESSIONAL SUMMARY

Entry-level cybersecurity candidate with practical experience in Windows/Linux environments, networking, technical troubleshooting and security-conscious application design. Independently implemented access boundaries, validation, auditability, and provenance controls across local systems. Seeking security operations, cyber defense, IT risk, or security-focused technical support roles; not presenting personal lab work as paid SOC employment.

TECHNICAL SKILLS

Security operations & analysis: Wireshark, Splunk, network traffic fundamentals, log review, firewall/IDPS concepts, incident-response fundamentals, threat investigation coursework

Secure systems: Windows access controls, least privilege, loopback binding, CSRF/origin protections, SHA-256 hashing, provenance checks, backups and recovery

Technical tooling: PowerShell, Python, Windows, Linux, WSL2, Docker, TCP/IP, IPv4/IPv6, Git/GitHub, JSON/schema validation

SELECTED TECHNICAL PROJECTS — INDEPENDENT ENGINEERING, 2026

ICY ALL Registry / Control

- Built a React/TypeScript system registry and paired Node control service with allowlisted operations and Origin/CSRF protections; local audit confirms 100 identities and 68 relationships, with 750 tests recorded passing November 9.

ICY Fabric / Mind

- Built SQLite event APIs, filtered history, SSE and JavaScript/Python SDKs, with a separate privacy-filtered local reasoning service; retained suites show 29 Fabric, 34 Mind and 2 Python passes, separately scoped from synthetic integration proofs.

ICY CERT ENGINE

- Built a Node/SQLite study workspace with offline bank download, durable review queues and reconnect sync; retained November 9 evidence records 14 API assertions and 24 Chromium checks, while generated study content remains explicitly unverified.

Personal Inquiry Engine

- Implemented FastAPI investigation APIs with scoped retrieval, Ollama reranking and SQLite version history; November phase-2 reports record 161 backend and 6 frontend passes, separately scoped from isolated-model integration proof.

PROFESSIONAL EXPERIENCE

Mail Handler / Expeditor, Inbound & Outbound Logistics | United States Postal Service | 2020–Present

- Verify drivers, destinations, shipping documents and trailer movements using operational systems and barcode records.

Junior IT Consultant / Field IT Intern | MyIT Services | Plano, TX | May 2025

- Inventory of 90+ computers, monitors and network assets at a client site; independently organized identifying information. Used PowerShell to capture hardware serial numbers, configurations and device specifications for usable technical records.

ClickList Technical Support & Customer Service | Kroger | 2016–2019

- Diagnosed account, application, device and connectivity problems; guided users through steps and escalated unresolved cases.

Junior Technical Support Representative | Suddenlink | 2014–2015

- Troubleshot internet, account and device issues using internal diagnostic systems; recorded findings and guided configuration.

EDUCATION & CREDENTIALS

Collin College — A.A.S. Cybersecurity and A.A.S. Computer Networking coursework, IN PROGRESS (not awarded). Dean's List: Fall 2024, Spring 2025.

College credentials — Cybersecurity Infrastructure Technician Certificate; Entry-Level Network Support Occupational Skills Award.

Certifications / exams — Microsoft Certified: Azure Fundamentals (AZ-900); Microsoft 365 Certified: Fundamentals (MS-900); CompTIA A+ Core 1 exam passed (not full A+ certification); Google Technical Support Fundamentals.
