CHAD HAMILTON

SOFTWARE DEVELOPER | AI APPLICATIONS & AUTOMATION

Wylie, TX | Dallas–Fort Worth | (469) 878-2466 | Justchadham@gmail.com

Portfolio: icynatural.github.io/chad-hamilton-portfolio/ | GitHub: github.com/icyNatural

PROFESSIONAL SUMMARY

Software developer building and validating local-first web applications, Python services and AI-integrated workflows. Experience includes React/TanStack applications, FastAPI services, responsive interfaces, offline storage, Docker-based model infrastructure and test-driven releases. Brings technical support experience and formal cybersecurity/networking study to production-minded application work.

TECHNICAL SKILLS

Languages & application development: Python, JavaScript, TypeScript, SQL, HTML/CSS, Kotlin; React, TanStack Start, Astro, FastAPI, Pydantic, REST APIs

AI & data: Ollama, ChromaDB, embeddings, retrieval, reranking, n8n, SQLite, IndexedDB, EXIF/JSON/CSV pipelines

Quality & delivery: Vitest, Playwright, Node test, Git/GitHub, Docker, Vercel/Nitro, responsive testing, error handling, technical documentation

SELECTED TECHNICAL PROJECTS — INDEPENDENT ENGINEERING, 2026

Photogression

- Extended a React/TanStack Start observation app with EXIF import, IndexedDB storage, additive restore and browser depth exploration; retained November 7 results show 143 passing unit tests and 42 browser checks; physical-phone tilt acceptance remains pending.

Personal Inquiry Engine

- Implemented FastAPI investigation APIs with scoped retrieval, Ollama reranking and SQLite version history; November phase-2 reports record 161 backend and 6 frontend passes, separately scoped from isolated-model integration proof.

ICY Discovery Lab

- Built a dependency-free Node laboratory with bounded workers, append-only investigations and portable scene/evidence exchange; retained terrain acceptance records 23 browser checks and a separate Windows launcher record shows 12 checks.

ICY ALL Registry / Control

- Built a React/TypeScript system registry and paired Node control service with allowlisted operations and Origin/CSRF protections; local audit confirms 100 identities and 68 relationships, with 750 tests recorded passing November 9.

PROFESSIONAL EXPERIENCE

Mail Handler / Expeditor, Inbound & Outbound Logistics | United States Postal Service | 2020–Present

- Verify drivers, destinations, shipping documents and trailer movements using operational systems and barcode records.

Junior IT Consultant / Field IT Intern | MyIT Services | Plano, TX | May 2025

- Inventory of 90+ computers, monitors and network assets at a client site; independently organized identifying information. Used PowerShell to capture hardware serial numbers, configurations and device specifications for usable technical records.

ClickList Technical Support & Customer Service | Kroger | 2016–2019

- Diagnosed account, application, device and connectivity problems; guided users through steps and escalated unresolved cases.

Junior Technical Support Representative | Suddenlink | 2014–2015

- Troubleshot internet, account and device issues using internal diagnostic systems; recorded findings and guided configuration.

EDUCATION & CREDENTIALS

Collin College — A.A.S. Cybersecurity and A.A.S. Computer Networking coursework, IN PROGRESS (not awarded). Dean's List: Fall 2024, Spring 2025.

College credentials — Cybersecurity Infrastructure Technician Certificate; Entry-Level Network Support Occupational Skills Award.

Certifications / exams — Microsoft Certified: Azure Fundamentals (AZ-900); Microsoft 365 Certified: Fundamentals (MS-900); CompTIA A+ Core 1 exam passed (not full A+ certification); Google Technical Support Fundamentals.
